Endpoint Security

Highlights

XeneX endpoint is used for threat detection, visibility, and compliance management. It complements the typical endpoint protection products, not replace them. It is designed to help organizations monitor and analyze security events occurring across their environments, including network, applications, and systems. XeneX endpoint collects and analyzes log data from various sources to identify potential security threats, anomalies, and suspicious activities.

- Automated Agent Deployment
- Data Collection
- Log Analysis
- Rule Matching
- Alerting and Correlation
- Dashboard and Visualization
- Response and Remediation
- Integration with flexibility
- Scalability

Our Vision

Continuously invest in technology, people and process improvements to deliver the most comprehensive cybersecurity technology platform and world-class white glove service for incident management. To be the leading SOCaaS, protecting our partners and customers, and helping them achieve their cybersecurity goals.
