

## XeneX SOCaaS

With over 12 years of experience and focus on Security Operations Center as a Service (SOCaaS), XeneX delivers a unique cybersecurity solution and unparalleled 7/24/365 SOC experience.

XeneX's software development team continues to extend the capabilities of XeneX platform. A leading industry platform, XeneX integrates several cybersecurity tools to achieve a single pane of glass of cybersecurity for the enterprise.

XeneX security analysts receive extensive training on the XeneX platform and must complete certification before joining the SOC team.

Multi-Factor Authentication (MFA)

**XENEX**  
SOC - A S - A - SERVICE

People, Process,  
Technology.

## Highlights

- Enhanced Security
- Reduced Credential Theft Risk
- Mitigation of Password Reuse
- Protection Against Brute-Force Attacks
- Phishing Resistance
- Compliance Requirements
- Reduced Insider Threats
- Remote Access Security
- Protects Sensitive Data
- Cost Savings
- User Identity Verification
- Ease of Use
- Flexibility
- Centralized Management
- Passwordless Authentication
- Trustworthy Remote Access

## IT Asset Discovery & Management

Implementing XeneX MFA is highly recommended for securing sensitive systems, applications, and accounts. It significantly reduces the risk of unauthorized access due to stolen passwords or compromised accounts. Organizations can choose the MFA solution that best fits their needs, considering factors such as user convenience, cost, and the level of security required.

XeneX partner with Microsoft, Google, and other leading MFA vendors in the industry to provide one-stop-shop for Multi-Factor Authentication (MFA) including monitoring, alerting, and reporting.

MFA solutions are security mechanisms that require users to provide multiple forms of verification before granting them access to a system, application, or service. MFA adds an extra layer of protection beyond traditional username and password combinations, making it significantly more difficult for unauthorized individuals to gain access to sensitive information or systems.

# Our Vision

Continuously invest in technology, people and process improvements to deliver the most comprehensive cybersecurity technology platform and world-class white glove service for incident management. To be the leading SOCaaS, protecting our partners and customers, and helping them achieve their cybersecurity goals.
