

XeneX SOCaaS

With over 12 years of experience and focus on Security Operations Center as a Service (SOCaaS), XeneX delivers a unique cybersecurity solution and unparalleled 7/24/365 SOC experience.

XeneX's software development team continues to extend the capabilities of XeneX platform. A leading industry platform, XeneX integrates several cybersecurity tools to achieve a single pane of glass of cybersecurity for the enterprise.

XeneX security analysts receive extensive training on the XeneX platform and must complete certification before joining the SOC team.

XeneX Risk Profiler

Highlights

- Monitor Cloud Attack Surface: The only solution in the market with full-blown cloud integrations to monitor attack surfaces:
 - AWS
 - Azure
 - GCP
 - Digital Ocean
 - Oracle Cloud
- Ransomware Susceptibility Report
- Comprehensive Reconnaissance
- Improve cyber risk ratings and brand reputation.
- Protect external attack surface and brand reputation
- AI-powered platform.
- Assess and monitor third party service providers.

XeneX Risk Profiler is a revolutionary external attack surface management platform transforming how companies manage their exposure to shadow risks, and how risks introduced by their third parties could impact your business and performance. XeneX Risk Profiler platform continuously scans and monitors your entire external attack surface, including web apps, cloud storage, APIs, and more, to detect vulnerabilities and minimize risk exposure.
